

## Installing the 2014 FRC NI Update (for ALL TEAMS)

# Installing the 2014 FRC NI Update (for ALL TEAMS)

This year the NI updates have been reconfigured into a single standalone installer. This means that the FRC Driver Station, cRIO Imaging Tool and other utilities such as the Camera Configuration Tool will all be bundled into a single installer which will **not require any components from the DVD**. The LabVIEW update is also included in this installer and will install if a LabVIEW installation is detected. **To use the DS and Imaging tool all teams must install the 2014 NI Update.**

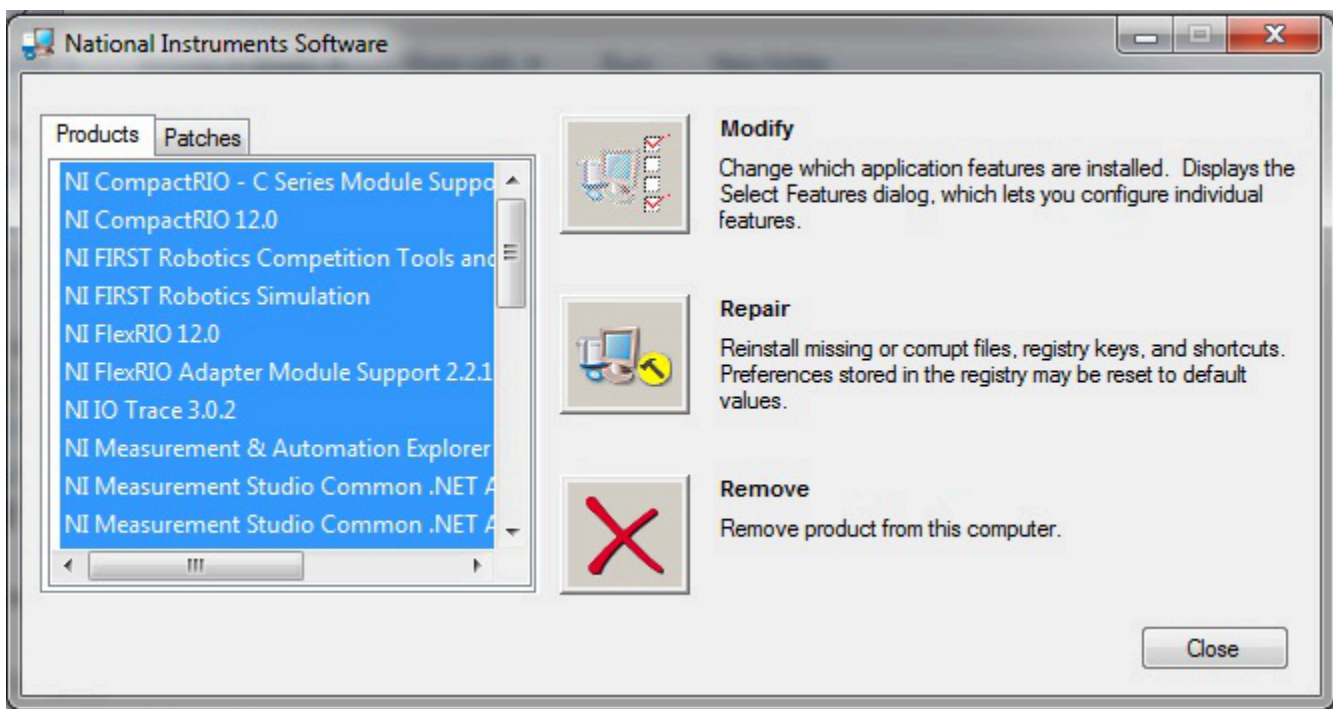

## Uninstall Old Versions (Optional)

# Installing the 2014 FRC NI Update (for ALL TEAMS)

Before installing the new version of LabVIEW it is recommended to remove any old versions, note that old versions will coexist with the new version, but the license for the FRC 2012 software will be expiring very shortly. Make sure to back up any team code located in the "User\LabVIEW Data" directory before uninstalling. Then click **Start >> Control Panel >> Uninstall a Program**. Locate the entry labeled "**National Instruments Software**", right-click on it and select **Uninstall/Change**.

## Select Components to Uninstall

In the left pane of the dialog box that appears, **select all entries**. The easiest way to do this is to click the top entry to highlight it, then scroll down to the bottom entry, press and hold shift and click on the last entry then release shift. Click **Remove**. Wait for the uninstaller to complete and reboot if prompted.

## OPTIONAL - Install LabVIEW

If you will be using LabVIEW to program your robot or if you wish to use the NI Vision Assistant software, [install LabVIEW from the DVD](#) before applying the NI Update. **C++ and Java teams not using NI Vision Assistant do not need to install anything from the DVD.**

# Installing the 2014 FRC NI Update (for ALL TEAMS)

## Download the NI Update

Download the NI Update from <http://www.ni.com/download/first-robotics-software-2014/4546/en/>

## Unzip the Update

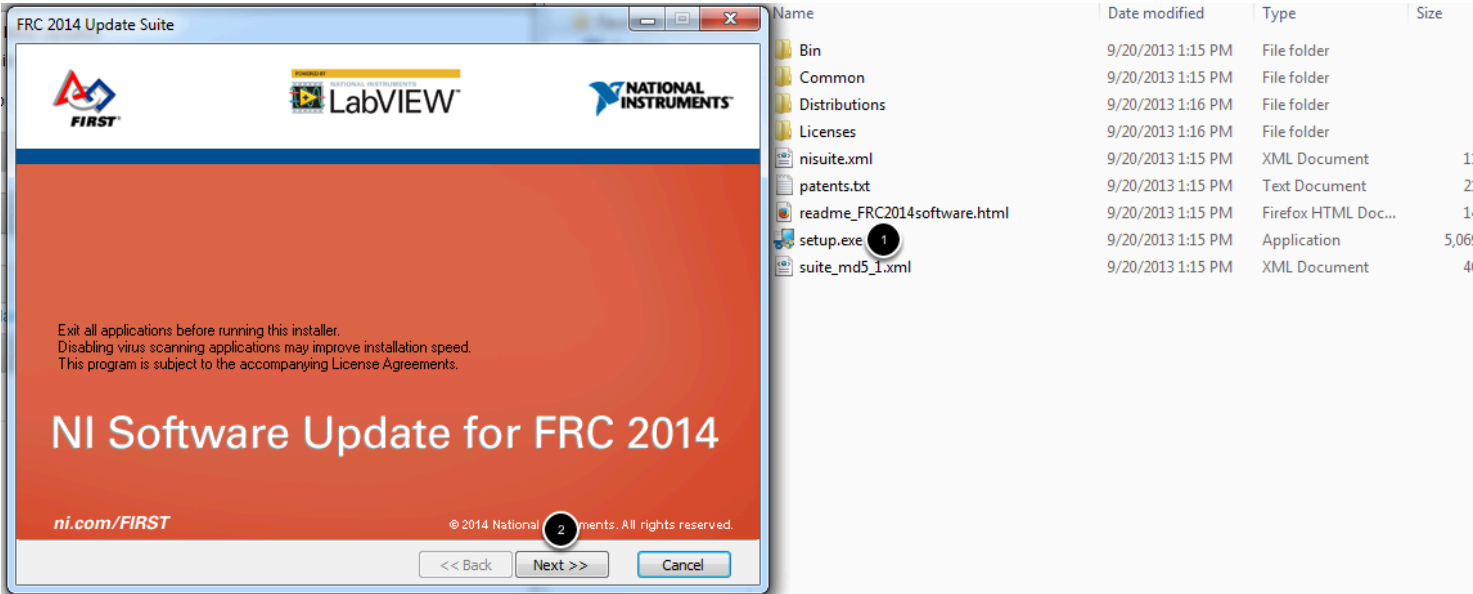

Locate and right click on the downloaded file and select **Extract All** to Unzip. By default the files will be unzipped to the current directory, press Browse if you wish to unzip to a different location. Click **Extract** to complete the operation.

Note that the update is currently still encrypted with the 2014 game password  
3Zones2Goals1Alliance!

## Enter Serial Number

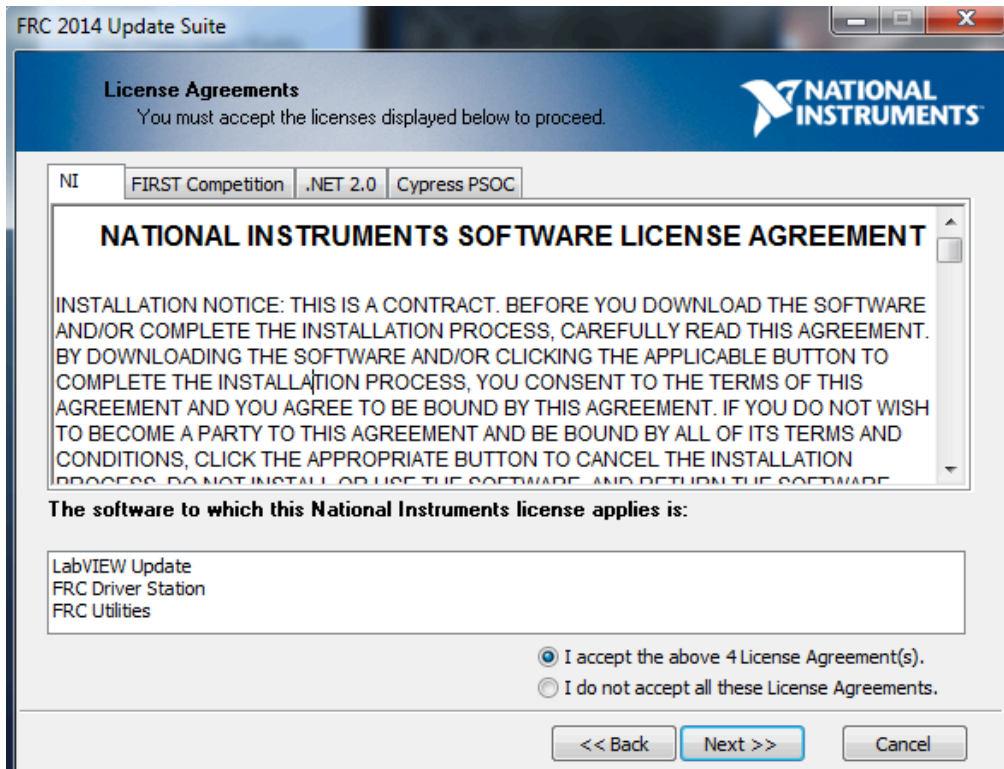

The screenshot shows a Windows-style dialog box titled "FRC 2014 Update Suite". The dialog has a blue header bar with the text "User Information" and "Enter the following information." on the left, and the National Instruments logo on the right. Below the header, there are three input fields: "Full Name:" with the text "eng-kocon" entered, "Organization:" which is empty, and "Serial Number:" which is also empty. Below the "Serial Number:" field, there is a note: "Leave the Serial Number field blank to use the product in evaluation mode." At the bottom of the dialog, there are three buttons: "<< Back", "Next >>" (which is highlighted with a blue border), and "Cancel".

Enter your name or computer name and organization if desired. Enter the serial number from the NI DVD in your Kit of Parts in the box and click **Next**.
